

## North Coast Celebrates Milestone!

The Flatiron, Skanska, and Stacy and Witbeck (FSSW) team recently celebrated the “halfway” point of the I-5 Manchester Bridge which is the centerpiece of the Build North Coast Corridor Program. To mark this, Caltrans and SANDAG sponsored an event to acknowledge the hard work of the FSSW field crews. Leaders from the City of Encinitas, Caltrans, California Highway Patrol, and San

Diego County Building and Construction Trades spoke at the event and crews were treated to breakfast at the Manchester Field Office.

The project team has overcome many challenges up to this point and it was an exciting moment for these efforts to be recognized by the project owners and various officials. Next, the team will demolish the existing center structure of the bridge and reconstruct the new bridge. After the new bridges are complete, a suspended pedestrian walkway will be hung below the structure and other improvements to surrounding roadways

will be completed. Elsewhere on the project, FSSW has completed the Segment 6 double track project, and the Segment 8 lagoon restoration will be wrapping up in July. Segments 2 and 3, the I-5 highway widening, is in full swing at 20 percent completion. The total project value is approaching \$600 million and there are multiple other construction packages which are expected to be added to the contract in the near future.

Nice work!
